

4 TROLLEYS

YOUR WAREHOUSE CAN'T LIVE WITHOUT

PLATFORM TROLLEY

These trolleys are simple but effective. They're really useful in the warehouse for distributing stock for storage, taking it out to the lorry, unloading deliveries...any time that you want to move pretty much anything anywhere, really!

Questions to ask when considering a platform trolley

What is its platform size and load capacity?

Whats it made of?

Does it need to be compact?

TIERED TROLLEY

If you make picking products from your warehouse as safe, easy and efficient as possible, you will make the most of your employees' time and ultimately need less staff to do the same amount of work.

Questions to ask when considering a tiered trolley

Can the trolley fit in the location needed?

Does it have enough storage space?

Is it durable?

HAND TRUCKS

Their design allows staff to transport items that are much heavier than they could carry. Unload deliveries, load lorries, shift boxes around.

Questions to ask when considering a hand truck

What is the weight capacity?

Is the toe plate big enough?

What are the wheels like?

Does it need to be folded away for transport or storage?

CAGE TROLLEY

These are perfect for loading up with stock at the warehouse to ship out to shops. They've usually got a large capacity, wheel around easily and can be simply secured in a lorry.

Questions to ask when considering a cage trolley

What is the volume & weight capacity?

Can you add in shelves?

Can it fold/nest when not in use?

Can it be locked?
